

RP400 Media Player

The RP400 is the new entry-level player from EnQii. It is based on the latest low-power processors from Intel and provides high performance with low power consumption.

While the RP400 is a low-cost player designed for networks with simple media needs, such as full screen or basic split screen functionality, which means it can be configured for several different screen layouts. The player will play standard definition video including MPEG1 & 2, H.264, Quicktime, AVI, DIVX, XVID. In addition, the RP400 will also play simple Flash animations.

The RP400 has a 120GB hard disk, which provides plenty of storage for media files. It also has VGA and serial connections, ensuring almost universal screen connectivity, and RS232 control with a compatible display

The player is fully compatible with RemoteTransfer™, the online Software as a Service (SaaS) digital signage and content management application from EnQii.
