

RP740 Media Player

Small form desktop machine with huge specifications!

Based on the Dell Optiplex 740, its capabilities include playing HD video up to 1080p, Flash, graphics, and VGA for connection to a display panel.

With its desktop small form factor design it can be expanded to support a number of additional applications such as TV tuners or alternative video cards for connection to digital displays.

When used with EnQii's market leading RemoteTransfer software yet more options are unlocked including RSS feeds, multizone display and panel controls via RS232 control.

Combined with the unit's low power consumption and heat generation the RP740 is also friendly to the environment.

The RP740 from EnQii can form the backbone of a robust and scalable digital signage solution. Being a dedicated digital signage appliance designed to perform to the highest standards of operation 24/7 you can be certain that your content will always be showing!

For a demonstration of EnQii's powerful and flexible digital signage solutions, please contact your local office or visit: www.enqii.com/contact/
